HOW MUCH FENCE DO I NEED?

A 5 acre square farm

569 m

of fence around it

114

posts at SIMO's 5 m gap

228

posts at chainlink's 2.5 m gap

THREE GRADES, EACH WITH A WRITTEN GUARANTEE

ALPHA

ZETA NOVA

PI

THE WRITTEN GUARANTEE

A 20-year (Alpha), 10-year (Zeta Nova) or 5-year (Pi) written guarantee against wire breakage due to red rust formation. Conditions apply. To know more about our guarantee, visit simosecureon.com/guarantee.

Most farms choose Zeta Nova or Pi with the graduated Q-Knot grid, 5 to 6 ft high; choose 6 ft where nilgai are the problem. For nilgai and cattle we usually suggest Zeta Nova or Alpha, with posts 5 m apart for better impact resistance. Add RHTT barbed wire where people are also a problem. A starting point for discussion, not for construction.
